PROFESSIONAL SUMMARY

AI Engineer with production experience building RAG pipelines, LLM-powered APIs, and semantic search systems. Strong foundation in software engineering with expertise in NLP, vector databases, and modern AI stacks including LangChain and embeddings. Proven ability to deploy GenAI workflows and optimize LLM performance using advanced prompting strategies and evaluation metrics. Experienced in full-stack development, cloud infrastructure, and Agile methodologies.

TECHNICAL SKILLS

- **AI/ML:** Large Language Models (LLMs), RAG Pipelines, Natural Language Processing (NLP), Semantic Search, Prompt Engineering (RTF, RACE), Vector Databases (Pinecone), Embeddings, LangChain, LangGraph, Hugging Face, TensorFlow, PyTorch
- **Languages:** Python, Java, JavaScript/TypeScript, SQL, C/C++, HTML/CSS
- **Frameworks & Libraries:** React, React Native, Django, Node.js, Express.js, FastAPI, Firebase
- **Cloud & DevOps:** Google Cloud Platform (GCP), Cloud Run, Vertex AI, IAM, AWS, CI/CD
- **Databases:** PostgreSQL, MongoDB, MySQL, Vector Databases
- **Tools & Platforms:** Git, JIRA, Postman, SoapUI, Figma, Trello, PEGA, Agile/Scrum, SAFe
- **Testing:** API Testing, Integration Testing, Regression Testing, LLM Evaluation Metrics (Precision, Reranking, LLM-as-a-judge), ML Evaluation Metrics (F1, Precision, Recall)

PROFESSIONAL EXPERIENCE

- **Cognizant** July 2025 – Present
  Software Engineer/ Analyst *Bridgewater, New Jersey*
  - Validated functionality across multiple application layers. Designed, developed, and enhanced full-stack components on the PEGA platform, implementing UI logic and backend behavior using **Java**.
  - Evaluate and optimize LLM responses using advanced prompting strategies **(RTF, RACE)** and metrics including **Precision, Reranking, and LLM-as-a-judge** to improve AI system performance
  - Developed and tested **RESTful** API integrations across on-prem and AWS cloud environments, validating request/response JSON schemas, data transformations, and system interoperability using **Postman**.
  - Execute **SQL** DML queries to validate backend events, troubleshoot data discrepancies, and analyze application behavior impact
  - Collaborate with cross-functional teams in SAFe Agile methodology, participating in sprint ceremonies and ensuring delivered features meet technical specifications
  - Document defects in **JIRA** with detailed reproduction steps and severity classification, reducing developer turnaround time
- **Findi** July 2024 – August 2025
  Software Engineer *New York, New York*
  - Developed and deployed cross-platform **React Native** mobile application (iOS & Android) on **Firebase**, delivering optimal performance and user experience in Agile framework
  - Integrated and deployed a **RAG Gemini system** to ingest user data and enable a personalized experience on the application.
  - Evaluated the RAG system based on the retrieval recall and precision, tuning semantic search parameters to achieve higher accuracy in document retrieval by **10%**.
  - Built and maintained scalable APIs using **Google Cloud Run**, optimizing backend performance and implementing IAM policies for secure access control

- Ensured seamless integration between React Native frontend and GCP backend services, managing permissions and cloud infrastructure
- Managed feature requests and bug fixes using Jira in Kanban setup, collaborating with design teams via **Figma** to align functionality with user-centric design principles

- **GLogic** May 2023 – June 2024
  Full Stack Developer *Edison, New Jersey*
  - Developed and deployed a dynamic **Google Cloud**-hosted web application for healthcare automation using **ReactJS**, **ExpressJS**, and **PostgreSQL**, enhancing operational efficiency.
  - Integrated **ChatGPT** into the application using an API, ensuring low latency for the customers when using the chatbot for smoother business flows.
  - Implemented prompt engineering templates and techniques into the chatbot system, to ensure optimal input from the customers, and optimal responses from the chatbot.
  - Designed responsive UIs with **React**, **Material UI**, and custom CSS, while implementing event-driven features to deliver a seamless user experience.
  - Built and integrated REST APIs using **Django** and Express, constructed scalable database schemas, and managed version control with **Git/GitHub** for collaborative development.
- **TVD Associates / Rutgers MBS Externship Program** September 2022 – December 2022
  Lead Extern *Edison, New Jersey*
  - Conducted research on member organizations and analyzed firm-member interactions
  - Developed data-driven rubric and scoring system to quantitatively rate organizational engagement

EDUCATION

- **Rutgers University–New Brunswick**
  Bachelor of Engineering in Computer Engineering; Minor in Computer Science
  - **Honors:** Dean's List
  - **Achievement:** Winning Project – Rutgers IEEE Codevengers Assemble Hackathon

CERTIFICATIONS

- Databricks Certified Generative AI Engineer – Databricks
- Google Cloud Digital Leader – Google Cloud
- Introduction to Vertex AI Studio – Google Cloud
- Encoder-Decoder Architecture – Google Cloud
- Algorithmic Trading and Finance Models with Python, R, and Stata Essential Training
- Algorithmic Trading and Stocks Essential Training
- Citi – Technology Software Development Job Simulation

KEY PROJECTS

- **Gemini RAG Pipeline Implementation:** Built production-ready Retrieval-Augmented Generation system using **LangChain**, vector embeddings, and **Pinecone** for semantic search capabilities
- **Qrion (LLM-Powered API System):** Developed and deployed LLM-based API services with optimized prompt engineering and response evaluation frameworks
- **GitSense (Codebase Semantic Search with RAG):** Semantic search and retrieval over real-world GitHub repositories using **Pinecone embeddings**, **vector databases**, and **Retrieval-Augmented Generation** (RAG).
- **IEEE Hackathon Winner:** Led winning team project, an automated Discord **agent** at **Rutgers IEEE** Codevengers Assemble Hackathon, demonstrating technical leadership and innovation

LANGUAGES

- English (Native), French (Professional Working)
